

Xinlong Le (ShiloH)

Ph.D. Candidate in Hydraulic Engineering | Huazhong University of Science and Technology
Email: xinlong_le@hust.edu.cn | Phone: +86 183 8229 0228 | ORCID: 0000-0002-8681-1036

Research Profile

Ph.D. candidate with interdisciplinary training in hydrology, climate extremes, remote sensing and multi-source Earth observation data assessment. Research experience covers watershed hydrological responses under global change, compound extreme events, precipitation product evaluation, CMIP6 scenario data, statistical downscaling, dataset construction and uncertainty diagnosis.

Education

Period	Institution	Degree / Major
2023-2027	Huazhong University of Science and Technology	Ph.D., Hydraulic Engineering
2020-2023	Southwest Jiaotong University	M.S., Tunnel Engineering
2016-2020	Hainan University	B.E., Road and Bridge Engineering

Research Interests

- Watershed hydrological responses under global change
- Compound climate extremes and hydrometeorological risk
- Satellite, reanalysis and climate model data evaluation and fusion
- Statistical downscaling, bias correction and uncertainty analysis
- Climate datasets, extreme indices and Earth system data products

Patents and Software Copyright

- Five invention patents related to water-resource attribution, reservoir operation, compound dry-hot event identification, tunnel deformation simulation and tunnel health monitoring.
- Two utility model patents related to tunnel loading experiments and model-test auxiliary devices.
- Software copyright: Multi-objective joint optimal operation system for cascade reservoirs.

Research Projects

- Fundamental Research Funds for the Central Universities, 2023-2026, Principal Investigator.
- China Yangtze Power research project on cascade reservoir digital operation and scheduling, 2023-2026, responsible member.
- National Key R&D; Program on basin-scale flood scenario deduction and intelligent decision-making, 2022-2025, participant.
- National Key R&D; Program on integrated water-system decision technologies for the Yellow River Basin, 2023-2027, participant.
- Hubei water conservancy key research project on digital-twin reservoir operation, 2024-2025, responsible member.

Academic Activities

- Oral presentation at the 41st IAHR World Congress in Singapore.
- Invited reviewer for the 5th International Conference on Artificial Intelligence, Information Processing and Cloud Computing (AIIPCC 2025).

Technical Skills

- Python and Java for hydrometeorological data processing, scientific computing, model evaluation and visualization.
- NetCDF, GeoTIFF, station observations, remote sensing products, reanalysis datasets and multi-dimensional gridded data.
- CMIP6 scenario data, statistical downscaling, bias correction, climate-extreme indices and uncertainty diagnosis.
- Hydrological modeling, precipitation product evaluation, multi-source data fusion, multi-criteria decision analysis, machine learning and swarm-intelligence optimization.
- Scientific writing, reviewer response, oral presentation and interdisciplinary collaboration.

Awards and Honors

- Science and Technology Innovation Scholarship, 2025.
- First-Class Doctoral Scholarship, 2023 and 2024.
- First-Class Academic Scholarship, 2018, 2020 and 2021; Special Academic Scholarship, 2019.
- First Prize, Challenge Cup Reveal-the-List Competition, 2025.
- Third Prize, Huawei Cup Graduate Mathematical Contest in Modeling, 2023.
- Outstanding Graduate and Merit Student, 2020; Outstanding Communist Youth League Member, 2018.
